Student Guide

Licence and Master's Program

2026-2027

Handbook of academic policies and regulations for students enrolled in the

Undergraduate Licence Program

Students should familiarize themselves with the contents of this document as they are required to know and comply with the policies, regulations, and guidelines set forth in this guide. The Mediterranean Institute of Technology reserves the right to amend any policy at any time. Students are responsible for adherence to the most up-to-date policies, procedures, and academic regulations.

I. Dean's Message

Dear Student,

At MedTech our philosophy of higher education is driven by a three-fold strategy serving one central mission of placing students in the center of all learning and teaching activities.

The first element of MedTech policy is to provide students with a personal exploratory learning environment. Our course offering and training are driven by a student-centered learning environment, in which students can contribute to the content of teaching, the learning process and learning objectives themselves. A key element of MedTech curriculum is the focus on problem-based and project-based learning. All students are trained in taking responsibility for their learning and the teachers, supervisors and the educational environment are all resources in this process.

The second element is to foster the knowledge triangle between education, innovation, and research by encouraging faculty and students at all levels to be creative independent thinkers and engage together in innovative projects and activities in and out of the classroom. MedTech is committed to providing a technical and social setting that can help improve the contribution of research and innovation to the resolution of key societal challenges.

The third element of MedTech strategy is to maintain strong national and international collaboration with industrial and academic stakeholders. The close relationship to industry is an important profile of MedTech. Our students are offered an academic environment in which theoretical knowledge is important – and at the same time an environment in which they grow as professional practitioners. We believe that this exchange of experience provides our students with better employment possibilities and an excellent opportunity for creating new business startups.

With best wishes of success.

Dr. Hichem Kallel

II. The University

The Mediterranean Institute of Technology (MedTech) is a private, independent institution of higher education founded in 2012. The university offers a variety of bachelor's and master's degree programs, with the common feature of having a scientific and experimental research focus. The language of instruction is English.

1. History

The Mediterranean Institute of Technology (MedTech) is the first English-speaking engineering school in Tunisia adopting an American curriculum. It was founded in 2012 by Professor Mahmoud Triki, Founder and President of the Mediterranean School of Business (MSB). Professor Triki aspired to make the university a regional hub of excellence in education, innovation, and entrepreneurship by offering a global education to students of the region and the continent. In fact, President Triki expressed the mission of the university in these words:

> *"The strategic location of Tunisia in the heart of the Mediterranean, combined with the diversity of its cultural heritage, constitutes major assets for the development of a regional hub of educational excellence. It is in this framework that we have developed the South Mediterranean University (SMU). Our mission at SMU is to train leaders capable of operating in a knowledge-based world economic order."*

MedTech opened its doors for the first cohort of undergraduate students in September 2014. In response to societal needs, MedTech has evolved into a renowned university within the country offering undergraduate and graduate degrees to students from around the world. In addition, its focus on excellence and innovation in education and technology has led to ranking among the nation's top universities. The university's history of achievements can be attributed to its outstanding faculty, excellent academic platform, and professional programs.

As of Fall 2020, MedTech offers three engineering programs: Computer Systems Engineering, Software Engineering and Renewable Energy Engineering; one Bachelor of Computer Science program; and five master's degree programs: Software Engineering, Business Computing with a focus in AI and Blockchain, Cyber security, BIM and Digital Health.

2. Vision Statement

The vision of the Mediterranean Institute of Technology (MedTech) is to be a regional hub of excellence in education, innovation, and technology entrepreneurship in Africa and the Mediterranean region.

3. Mission Statement

The Mediterranean Institute of Technology (MedTech) is a dynamic institution of higher education committed to providing students from around the region and the world with a "global

education" of international quality in a country known for its pleasant climate and welcoming culture.

MedTech affirms commitment to promote an educational environment for critical thinking, intellectual curiosity, teamwork and respect for the views and values of a diverse population. It also prepares students to contribute and lead innovative ventures in today's globalized world.

To fulfill its mission and realize its long-term vision, MedTech has adopted a strategy based on seven pillars:

- *Professors:* outstanding faculty holding PhDs from world-renowned universities.
- *Programs:* programs and curricula aligned with the best engineering schools in the world and giving place to the development of soft skills (leadership, communication, group work, etc.) required for a successful career.
- *Pedagogy:* innovative teaching methods combining theoretical rigor with project-based learning. Each year, our programs include a creative design course integrating skills and knowledge taught in various courses.
- *Facilities*: state-of-the-art infrastructure, labs, and facilities.
- *Partnerships:* a rich set of local and international partnerships, spanning universities, industrial companies, technology leaders, and standards organizations. Synergies with the Mediterranean School of Business (MSB) are leveraged to provide our students with a well-rounded training in business and tech venture management and in entrepreneurship training. Engagement with the community and the wider regional environment are fostered through outreach and professional educational programs.
- *Participants*: outstanding students with the drive and ambition to become leaders and technology entrepreneurs, and who actively contribute to a diverse, multi-cultural and supportive campus environment conducive to academic learning and personal growth.
- *Processes:* governance and internal processes (recruitment, curriculum review, course evaluation, etc.) that target accreditation from the leading higher education quality assurance agencies and ensure we stay at the forefront of quality in education.

4. Values

At the Mediterranean Institute of Technology (MedTech), we share a common set of values that guide us in making our institution a pleasant, inspiring, and supportive learning environment:

- *Respect:* We treat each other with dignity and respect, regardless of gender, age, ethnicity, beliefs, or disability. We value diversity within our faculty, staff and student bodies and promote cultural exchanges, dialogue, and tolerance.
- *Integrity:* We conduct our work with integrity and honor, and we are deeply committed to honesty and transparency in all our processes. Management is committed to the fair application of policies and procedures without prejudice or discrimination.
- *Collaboration:* We value and reward individual performance and are committed to the personal growth of our faculty, staff, and students. We cultivate team spirit and respect

the privacy of all the members of our community. We handle private records with the necessary care and confidentiality.

- *Connectivity:* We work to minimize the environmental impact of our operations. Moreover, we are committed to making our institution socially responsible and actively engaged in contributing to the welfare and prosperity of our community, country, and region. We work so that access to our institution is within the reach of the widest possible audience, basing our admission criteria solely on academic merit and potential. We apply all our policies, procedures, and regulations with fairness and integrity. We share a collective belief that good governance is key to our success. We promote all aspects of good governance throughout our work, including transparency, efficiency, continuous evaluation, the effective integration of information technology in our processes, and the engagement of all stakeholders in the decision-making process.

5. Accreditation

The Mediterranean Institute of Technology is recognized by the Tunisian Ministry of Higher Education and Scientific Research as a private engineering school since 2014. Our Academic Programs, delivered both face-to-face and online, are in alignment with the Ministry's requirements[1]

The Licence in Computer Science programme at South Mediterranean University (SMU) has been internationally accredited by ASIIN, a recognized accreditation agency for higher education programmes in Computer Science, engineering, natural sciences, and related fields. ASIIN has awarded the programme the Euro-Inf® Bachelor Quality Label, confirming that it meets the European Euro-Inf Framework Standards and Accreditation Criteria for Informatics Degree Programmes.

The accreditation was awarded on December 12, 2025, and is valid until September 30, 2031, recognizing the programme's quality and alignment with international standards in Computer Science education.

III. Course Management

1. Academic Year and Class Schedules

The academic year at MedTech consists of two terms: Fall (from September to December) and Spring (from January to May), and an optional summer term (from end May to end June). Each term stretches over 15 weeks (about 3 and a half months) except the summer session which stretches over four weeks only. Class meeting times are typically scheduled Monday through Friday, 8:30 a.m. to 6:30 p.m. Make-up classes may be scheduled on Saturdays, with at least a week's notice from the professor or the administration. MedTech classes are held once, twice or three times a week.

2. Attendance and Audit

Regular and prompt attendance in all class and laboratory sessions is compulsory and essential for successful teaching and learning. Faculty are required to maintain records of student attendance through the university's course management system (CMS). The administration also regularly assesses attendance. University guidelines for lateness and attendance are as follows:

- Arriving ten minutes late counts as an absence.
- Students are responsible for managing their course attendance to ensure that absences do not exceed the maximum allowance, including justified absences. Students who exceed the allowed number of absences per course will be excluded from that course and will not be permitted to sit for the final and make-up exams. They will need to retake the course and pay the associated fees.

The absence limits per course credit are as follows:

- 8 absences in a 4-credit course (the 9th leads to exclusion)
- 6 absences in a 3-credit course (the 7th leads to exclusion)
- 4 absences in a 2-credit course (the 5th leads to exclusion)
- 3 absences in a 1.5-credit course (the 4th leads to exclusion)
- 2 absences in a 1-credit course (the 3rd leads to exclusion)
- 1 absence in a 0.5-credit course (the 2nd leads to exclusion)

It is the student's responsibility to manage their attendance effectively. Common reasons for absences, such as lateness, sickness, sickness, travel, events, driving license exams, traffic, and parking issues, count within the allowed absences per course.

For exceptional cases such as family emergencies, severe medical emergencies, accidents, or renewing residency papers abroad, justifications must be provided to the Board of Study (BOS) within 48 hours (about 2 days). The BOS meets weekly to process all requests, and a decision will be communicated thereafter. Please note that the approval of appeals is not automatic.

Special Status

Students granted a special status for work or justified severe health situations are allowed additional absences:

- 3 extra absences for each 4-credit course
- 2 extra absences for each 3-credit course
- 1 extra absence for each 1.5-credit course

Requests for special status must be submitted to the Program Management Team by the communicated deadline (refer to the Academic Calendar).

Leave of Absence

Under exceptional circumstances, such as personal reasons or participation in extracurricular events, students may apply for an academic leave of absence. To be eligible, students must be in good academic standing, as defined in this guide. The application process requires students to submit a completed leave of absence form, along with the necessary supporting documents, to the Program Management department for approval.

3. Transfer Students

Applicants can request a transfer either internally within MedTech (e.g., from pre-engineering to licence programs) or externally from other institutions. Candidates must submit their official academic transcripts, listing all courses taken, along with their respective syllabi. Transfer files must be completed and submitted within the application deadlines.

Once a transfer request is accepted, the program director will assess the applicant's eligibility for credit transfer according to a procedure that considers the course implementation and requires a minimum of 75% similarity. Note that courses already passed in a degree program cannot be transferred.

If the decision is favorable, the program director decides on which credits to transfer and may recommend a study plan accordingly. Further assessment(s) could be required.

4. Course Information

a. Course Numbering System

Every course at MedTech is associated with a unique course code denoting the subject code followed by a numeric code. It comprises 2 to 4 alpha characters (A), encoding the subject area, followed by 3 numeric characters (N): AA[AA]-NNN. The first numeric character is the course level identifier and indicates the level of the course content. Licence courses are identified as levels 1 to 3. The second and third numeric characters refer to the course identifier. The second usually encodes the sub-area within the subject.

Currently, there are 9 subjects:

Code	Description
COM	Communications
CS	Computer Science
ECE	Electrical & Computer Engineering
ENG	English
ISS	Independent Study & Seminars - Project courses
MATH	Mathematics
MGMT	Management
INT	Internship
PSY	Psychology

b. Course Credit Hours Definition

The curriculum has been carefully designed to achieve the desired learning objectives. It is compatible with the recommendations of recognized international and national accreditation agencies and in line with the most prestigious engineering schools.

All MedTech courses are valued in US credit hours. The number of credit hours associated with a course usually corresponds to the number of hours per week for that course. Courses are worth three to four credits each. For example, a three-credit course consists of 39 contact hours per term. Courses with a lab component may include additional contact hours.

US credit hour	European Credit Transfer and Accumulation System (ECTS)
3	4.5
4	5.5

c. Course Prerequisites

A prerequisite is a course required as prior knowledge for enrollment into another dependent course. This information is mentioned in each course syllabus following the description of the course. Students are not permitted to enroll for a course with a prerequisite unless the prerequisite course has been completed with a passing grade. In case of doubt, the student should contact the program manager.

d. Course Syllabus and Administration

For all courses, the students are provided with a course syllabus during their first lecture. The course syllabus contains:

- The course title and code.
- Course prerequisites (if any).
- Course content.
- Learning outcomes.
- Teaching material.
- Schedule of classes.
- Assessment policy and scheme.

Course policies regarding the submission and weighting of all assessment instruments are clearly communicated to students on the first day of class and in the course syllabus.

The course syllabi are reviewed for relevance and coherence by the Academic Affairs and Curriculum Committee on a regular basis. When needed, the course content, the course learning outcomes and/or assessment schemes are adjusted.

e. Course Evaluations

Course evaluations and student feedback are an integral part of the process that helps MedTech ensure teaching effectiveness and quality. In fact, each course is subject to a course evaluation by the students, one halfway through the term, and another one at the end of the term. For this purpose, each term, a student course representative (SCR) is assigned to represent his or her colleagues for a specific course and cannot represent more than one course in a term. If the course is taught in different groups, a student from each group is to be selected. Selection for course representatives is volunteer based; if no candidate volunteers, the professor may randomly select a student.

- Midway Course Evaluation: Before the week of midterms, the professor asks the students to fill in a form that will be found on Moodle called midway evaluation. The form contains three questions about the course implementation (what went well, what did not go well and what can be improved).

  After the midterm week, the student course representative will receive feedback from the class and should send back recommendations for improvements that need to be implemented during the next half of the term.

- End-of-Term Course Evaluation: The end-of-term course evaluation is a mandatory online survey that consists of assessment questions on the course and the professor. Students are required to complete course evaluations carefully and fairly. Students who do not complete the end-of-term course evaluation within the deadlines will be sanctioned and they can't see their grades up to two days prior to the end of the appeal period. Course evaluations are anonymous and are only shared with faculty at the end of the term and following grade posting.

5. Student Course Load

- The regular credit load for Licence full-time students is 47 US credit hours per year.

For the summer term, the credit load should not exceed 8 credits for each student.

- The regular credit load for Master full-time students is 42 US credit hours per year. For the summer term, the credit load should not exceed 8 credits for each student

IV. Capstone Defense Requirements

To be eligible to defend the capstone project, students must meet the following prerequisites:

- Completion and validation of all the curriculum courses.

V. Graduation Requirements

To graduate, a student must fulfill all the following requirements:

- Validate 75% of 144.5 US/ 209 ECTS program credits (Licence Students).
- Validate 100% of 84 US/ 201 ECTS program credits (Master Students).
- Maintain a cumulative GPA of 2.0 or higher.
- Validate all Pass/Fail courses (including internships and seminar courses)
- Validate a mandatory internship
- Validate the e-portfolio.
- Have a grade D+ or above in all the courses (Licence Students).
- Have a grade C- or above in all the courses (Master Students).
- Have at most two courses validated with the grade D+ per year (Licence Students).
- Validate all capstone requirements
- Have a passing grade C or above in the capstone project.

Exit Interviews

Graduating students must participate in exit interviews to improve MedTech's education delivery and academic processes.

VI. Scholarships

1. Dean's List

The Dean's List is reserved for full-time students who earn a term grade point average (TGPA) above 3.50 for that term, provided they have no record of academic or behavioral misconduct. This achievement is posted on the student's academic transcript in the corresponding term. A certification of distinction is awarded to students on Dean's list at the end of the term to recognize excellent academic performance.

2. Scholarships

SMU Foundation, a nonprofit association created by SMU since 2018, offers three types of partial to fully funded scholarships (Excellence, Equality and Diversity scholarships) to talented and passionate students with excellent academic records, a strong investment in extra-curricular activities, giving them access to a top-quality education for post baccalaureate or Master's degree programs at MSB and MedTech. SMU Foundation entry-level scholarships are awarded on a competitive basis, and candidates are evaluated based on key criteria, including academic performance, extracurricular involvement and leadership, motivation, and proficiency in English. The number of scholarships offered from year to year may vary. The scholarship program is also open to candidates who apply to our joint programs (MSB HEC or MedTech HEC) but the scholarship only covers the tuition fees of our schools in Tunisia.

a. Excellence Scholarship – 25%, 50% & 100% of tuition fees

Entry-level for new students:

- For exceptional students: Candidates with an excellent academic record, talented, passionate, and invested in extra-curricular activities.
- Candidates to Pre-engineering and Engineering.
- Scholarship value: From 25% to 100% of tuition fees depending on the candidates' ranking among other applications.
- Periodicity: one year to be reconducted annually.
- Reconduction criteria: Maintain 3.3 CGPA
    - Selection criteria: merit

To maintain the EXCELLENCE scholarship, you will have to:

- Pass the academic year with a minimum CGPA of 3.3
- Have no disciplinary action at any time during your curriculum
- Ensure a satisfactory academic progress and have at least 2 extra-curricular activities (clubs, associations, internships)

b. EQUALITY Scholarship - 100% of tuition fees

Candidates with an excellent academic record, talented, passionate, and invested in extra-curricular activities but who also have financial difficulties.

- Candidates to Bachelor's, Engineering, or master's studies.

- Scholarship value: 100% of tuition fees
- Periodicity: One year to be reconducted annually
- Reconduction criteria: successful transfer to the next grade and a minimum CGPA of 2.5
- Criteria: Merit, social and geography

To maintain the EQUALITY scholarship, you will have to:

- Ensure a satisfactory academic progress (Minimum CGPA of 2.5 and no failing grade)
- Have at least 2 extra-curricular activities (on-campus job, clubs, associations, internships)
- Have no disciplinary action at any time during your studies at SMU

c. Diversity Scholarships – Up to 30% of tuition fees

This scholarship aims to promote pluralism and diversity.

- For international candidates from emerging countries and/or candidates with a disability.
- Candidates to Bachelor's, Engineering, or master's studies.
- Scholarship value: Up tp 30% of tuition fees
- Selection criteria: nationality and/or medical record
- Application: Upon registration DIVERSITY scholarships are maintained until graduation.

d. Term-level scholarship for current students – 25%, 50% & 100% of tuition fees

Top 3 Excellence Scholarship: is awarded each term to the 1st, 2nd and 3rd best GPAs of students of each cohort:

- Minimum 3.3 GPA
- Condition: Full time student (min 18cr)
- Scholarship value: Top 1 = 100%; Top 2 = 50%; Top 3 = 25%
- Periodicity: Scholarship is applicable for the next academic term of study

VII. Assessment and Grades

1. Assessment Policy

Assessments are a key component of the learning process at MedTech as it determines how well the learning outcomes are achieved. All courses at MedTech are evaluated *by continuous assessment methods*, such as homework assignments, quizzes, projects and presentations.

Three exam sessions are run per term: midterm exams, final exams, and make-up exams. Instructors are required to correct within a reasonable timeframe all assignments and examinations. Final exams will not be returned to students however they are welcome to schedule a time to view their exam for 5 minutes and return them back to the instructor during the appeal period.

Some courses are assessed using a Pass/Fail grade. Others would assign a letter grade to each student at the end of the term reflecting the level of the student's academic performance in that course. The grading scale extends from A to F:

Master programs

- A letter grade of C- or above corresponds to a passing grade. The student earns the credits for the course.
- A letter grade of D+ or below corresponds to a failing grade. The course must be retaken.

Licence Program

- A letter grade of C- or above corresponds to a passing grade in the Licence program. The student earns the credits for the course.
- D+ corresponds to a passing grade without earning the credits for that course.
- A letter grade of D or F corresponds to a failing grade. The course must be retaken.

If a student withdraws from a course, a special letter grade (W) is recorded on the transcript. Table 1 lists all the letter grades with their definitions.

2. General Examination Rules

Students must comply with all the regulations below governing examinations. Any student contravening the regulations will be subject to disciplinary action. Such actions may lead to permanent mentions on their academic record and in some cases the termination of their enrollment at MedTech.

- Students must comply with the MedTech Honor Code.
- Any form of cheating or attempt to commit cheating is sanctioned.
- A proctor discovering any behavior of academic dishonesty during an exam will report the issue to the Student Affairs by filing a "Report of Student Academic Misconduct."
- Students are required to carefully follow the proctor's instructions for the entire exam process, including the proctor's seating assignment.

- Students are not allowed in the examination room if their names are not on the exam attendance list.
- Students must bring their MedTech-ID card to examinations and must leave them on the table for the duration of the exam.
- Students must sign the exam attendance sheet.
- The proctor must verify the student's identity before administering the exam by checking the student MedTech-ID card.
- Students cannot share any materials, including calculators, during the exam.
- The use of cell phones and other electronic devices is not allowed.
- Students are admitted to the exam room if they arrive within 15 minutes after the start of an exam. Late arrivals will not be allowed in additional time.
- Students are not allowed to leave the exam room during the first 60 min.

3. Missing Exam Policy

Missing any exam will automatically result in a grade of zero on the exam. Any impediment beyond the student's control must be reported to the administration, with the appropriate supporting documentation, at least 7 days before the exam. Authorization to retake the exam will be granted on a case-by-case basis by the Examination and Appeals Committee without the possibility of any appeal.
In extreme cases of emergencies which prevent the student from taking an exam during the official exam period, and with proper supporting documentation, the student may be granted an exemption by the Examination and Appeals Committee.
If an exemption is granted to the student, the below rules apply:

- A student who fails to show up for the midterm exam must provide complete documentation. The final exam grade will count as both the final and the midterm grade.
- If an incapacitating illness prohibits taking a final examination, the student must notify the administration and provide complete documentation one week before the scheduled examination.
- A student who fails to appear for the final exam will not be permitted to take the make- up exam unless the program manager determines that extraordinary circumstances exist.

4. Retaking Courses

A student may retake a course for which he/she received a failing grade (F or D grade) after taking the make-up exam, and/or retake a course from which the student withdrew (subject to credit overload restrictions) or if he/she wishes to improve a passing grade to enhance his/her GPA, provided it does not exceed the maximum allowed retakes. Retaking a course does not forfeit the student from meeting the minimum attendance requirements or from adhering to other academic performance policies that apply to all students.

5. Grading Scale

The grade point average (GPA) is based on a four-point scale.
The university's grading scale is provided in Table 1. If faculty members make minor changes to the grading scale, they publish it in the course syllabus at the start of the term.

GPA	Percent Grade	Letter Grade	Assessment
4.00	93.2 – 100.0	A	Excellent in most aspects
3.67	86.0 – 93.1	A-	Very good work
3.33	78.8 – 85.9	B+	Generally, very good work
3.00	71.6 – 78.7	B	Good work
2.67	64.4 – 71.5	B-	Quite good work with some shortcomings
2.33	57.2 – 64.3	C+	Fair work
2.00	50.0 – 57.1	C	Acceptable work to validate the module
1.67	42.8– 49.9	C-	Unsatisfactory work to validate module
1.34	35.6 – 42.7	D+	Not Satisfactory
1.00	28.4 – 35.5	D	Completely unsatisfactory, course must be retaken
0		F	Completely unsatisfactory, course must be retaken
NA		P	Passing, equivalent to D+ or higher
NA		T	Transferred course
NA		EL	Student is eliminated from the course; the course must be retaken
NA		W	Withdrawal
0		XF	Eliminated for cheating

Key to Transcripts of Academic Record

6. Grade Point Average

MedTech uses two grade point averages: the term grade point average (TGPA) and the cumulative grade point average (CGPA).

a. Term Grade Point Average (TGPA)

The TGPA is the grade point average of grades earned in a particular term. It is calculated by multiplying the grade point value of the letter grade by the number of credit hours each course is worth, then summing the grade points of courses taken in a particular term and dividing it by the total number of credit hours of courses taken in that same term.

b. Cumulative Grade Point Average (CGPA)

The CGPA is calculated by multiplying the grade point value of the letter grade by the number of credit hours each course is worth, then summing up the grade points of courses taken in all terms and dividing it by the total number of credit hours of courses taken in all terms.

c. Term Grade Point Average (TGPA)

The TGPA is the grade point average of grades earned in a particular term. It is calculated by multiplying the grade point value of the letter grade by the number of credit hours each course is worth, then summing the grade points of courses taken in a particular term and dividing it by the total number of credit hours of courses taken in that same term.

d. Cumulative Grade Point Average (CGPA)

The CGPA is calculated by multiplying the grade point value of the letter grade by the number of credit hours each course is worth, then summing the grade points of courses taken in all terms and dividing it by the total number of credit hours of courses taken in all terms.

7. Academic Standing

To maintain a good academic standing in a term, a student must:

- maintain a CGPA of at least 2.00,
- have no academic misconduct recorded during the term, and
- obtain a passing grade or above in all terms.

8. Academic Probation

A student with a CGPA that is lower than 2.00 is placed on academic probation.

VIII. Academic Integrity and Code of Conduct

1. Integrity

MedTech places a strong emphasis on the integrity of academic work. It is the responsibility of all MedTech community members, including faculty, staff, and students, to conduct all academic endeavors with honesty, fairness, and transparency and not tolerate any forms of falsification, misrepresentation, or deception. Students are responsible for acting in accordance with the MedTech Honor Code, which covers both academic and non-academic misconduct.

Academic violations are acts committed by a student, which interfere in any way with the fair and honest evaluation of his/her academic performance. Academic violations of the MedTech Honor Code include but are not limited to the following:

- Plagiarism of ideas or words.
- Any form of cheating.
- Presenting falsified research data.
- Submitting the same assignment in more than one course, without the consent of the instructor.

Non-academic violations involve any type of non-academic misconduct. Non-academic violations of the MedTech Honor Code include but are not limited to the following:

- Destruction of school equipment or property.
- Disruption of the classroom.
- Use of unauthorized electronic equipment in the classroom.
- Verbal or physical abuse.
- Harassment.

2. MedTech Honor Code

The values of honesty, integrity, scholarship, and academic excellence are central to the mission of MedTech. All members of the community, including faculty, staff, and students, are expected to always adhere to the values of honesty, integrity, fairness, and mutual respect, in both their academic and non-academic endeavors. Furthermore, all members of the community are expected to promote these values.

Students are required upon enrollment in MedTech to sign the MedTech Honor Code. By signing the Honor Code, students are trusted to adhere to the above values. Any breach of this code of honor compromises the spirit of trust and negatively impacts the mission and image of the university. Violations of the MedTech Honor Code include but are not limited to the following categories:

f. Academic Integrity Violations

- Plagiarism of ideas or words.
- Fabrication of data or sources.
- Impersonation.

- Submitting the same assignment in more than one course, without the consent of the instructor.
- Unauthorized collaboration.
- Assisting others in committing academic misconduct.

g. Inappropriate Behavior

- The use of unauthorized electronic devices such as mobile phones in the classroom.
- The use of personal computers or laptops during class time without the approval of the instructor.
- Smoking inside school buildings.
- Consumption of alcohol or any type of narcotics on school grounds.
- Eating and drinking during class time.
- Inappropriate attitude on MedTech grounds.

h. Disrespectful Conduct

- Disrespectful conduct towards MedTech staff members.
- Disrespectful conduct towards fellow students.
- Violation of library regulations and of any notices and/or regulations posted in specific areas on campus.
- Disrespect of campus as a learning space, including disruptive behavior and/or the damage of equipment in classrooms, laboratories, and other facilities.

3. Class Dismissal

Students who demonstrate disrespectful or disruptive conduct in the classroom are dismissed from class for the rest of the session. Dismissed students are marked absent for that session. The administration keeps track of students who are dismissed from class due to behavioral issues.

If a student reaches two dismissals, he/she will be notified by the program manager that he/she will need to meet with the administration before being allowed to return to class. If a student reaches three dismissals, he/she will be required to meet with the Disciplinary Committee who will decide on more severe disciplinary sanctions.

4. Types of Sanctions

Students who violate, attempt to violate, or assist others in violating the MedTech Honor Code will be penalized. Based on the severity of academic or non-academic misconduct, certain sanctions may apply.

The following are the types of sanctions that can be applied:

- *Warning:* verbal or written notice to the student stating that he/she has violated MedTech rules and that the reoccurrence of such a breach of regulation, within a time- period stated in the warning, will result in a more severe disciplinary sanction.
- *Class Dismissal:* expulsion from the classroom until the end of class session. Dismissed students are marked absent for that session.

- *Disciplinary Probation:* exclusion from participation in academic and/or extracurricular activities for a specified time-period.
- *Compulsory Service:* requirement to do unpaid community service.
- *Restitution:* reimbursement for damages done to MedTech property.
- *Assignment of a zero grade on a course component:* a zero grade on an exam, quiz, or other assessment component of a course. This is the minimum penalty sanctioned for a student found guilty of plagiarism or cheating.
- *Assignment of an F as a final course grade:* an F as a final course grade will be assigned to the student in cases of academic misconduct. This grade will be reported on the transcript.
- *Suspension:* exclusion from classes or other activities at MedTech for a defined period.
- *Dismissal:* permanent expulsion from the university. A student who has been dismissed may not re-enroll in any academic program at MedTech unless/until the Dean reapproves his/her readmission. The final decision will be made by the Disciplinary Committee.

5. Academic Misconduct Sanctions

Type of academic misconduct	Description/Examples	Sanctions
Plagiarism	Presenting the work, ideas, or words of another as one's own (copying material without quotations, copying, and submitting a paper from an online source, copying code from an online source)	• Grade Reduction • Zero on assignment • Written warning • AM (Academic Misconduct) on transcript • F in course • Community service • Disciplinary Committee
Unauthorized collaboration	Working too closely with another student on an individual assignment so that the submissions are too similar.	• Grade Reduction • Zero on assignment • Oral/Written warning • AM on transcript • Community service • F in course • Disciplinary Committee
Fabrication	False, misleading, or invented references. Made up survey or experimental data.	• Grade Reduction • Zero on assignment • Written warning • AM on transcript • Community service • F in course • Disciplinary Committee

Unauthorized resubmission	Submitting work previously submitted without prior approval of instructor.	• Zero on assignment • Written warning • AM on transcript • Community service • F in course • Disciplinary Committee
Possession of an unauthorized aid	Carrying unauthorized aid such as a calculator or electronic device, even if not used, during an exam.	• Oral warning • Zero on examination • Written warning • AM on transcript • Community service • F in course • Disciplinary Committee
Impersonation	Pretending to be someone else or using their credentials (taking a test for a friend, covering for a friend during attendance, etc.)	• Oral warning • Zero on examination • Written warning • AM on transcript • Community service • F in course • Disciplinary Committee
Aiding another student in committing an offense	Letting a friend copy an assignment for a class, leaving exam responses visible to other students, etc.	• Oral warning • Zero on examination • Written warning • AM on transcript • Community service • F in course • Disciplinary Committee
Interference	Interfering with another student's academic work (stealing or modifying another student's work, etc.)	• Zero on assignment • Written warning • AM on transcript • Community service • F in course • Disciplinary Committee

6. Behavioral Misconduct Sanctions

Type of behavioral misconduct	Description/Examples	Sanctions
Non-physical harassment	Conduct that harasses a community member (use of inappropriate language, nicknames, etc.)	• Oral/Written warning • BM (Behavioral Misconduct) on transcript • Apology letter • Probation • Disciplinary Committee
Disrespect for the MedTech community	Smoking in unauthorized areas, damaging MedTech property, not keeping facilities clean, etc.	• Oral/Written warning • BM on transcript • Apology letter • Probation • Financial indemnity • Community service • Disciplinary Committee

Physical harassment and assault	Aggressive or intimidating actions, physical violence, or threats of physical assault.	• Oral/Written warning • BM on transcript • Apology letter • Probation • Community service • Disciplinary Committee
Inappropriate in-class **behavior**	Use of cell phone or electronic devices in class, talking or other disruptive behavior in class, disrespect towards students or the professor, etc.	• Dismissal from class • Oral/Written warning • BM on transcript • Apology letter • Probation • Community service • Disciplinary Committee

IX. Complaints and Appeals

A complaint is the expression of a specific concern about a course, program, or any other issue relating to student life on campus. An academic appeal is defined as a formal request to review any academic decision related to a student's progress, assessment, or award.

1. Internal Procedures

MedTech guarantees a fair, effective, and timely process for handling students' complaints and academic appeals. MedTech complaints and appeals procedures are approved, overseen, and reviewed annually by the Examination and Appeals Committee.

a. Appeals and Complaints

A student has the right to file a complaint or request an appeal without the risk of adverse consequences. It is essential that students follow the procedures and adhere to deadlines for appeals.

b. Support and advice

The Office of Registrar may guide and support students in the complaint and/or an appeal process. Students filing a complaint or applying for an appeal can request a formal hearing at any time.

c. Monitoring

The Examination and Appeals Committee monitors, evaluates, and improves the effectiveness of the complaints and appeal procedures on a regular basis.

d. Formalities

The administration will not process any appeal sent by email. Students must submit a duly filled appeal form to the Office of Registrar.

2. Appeal of Attendance Record

Students are responsible for checking their attendance status on the student course management system on a regular basis. Students may appeal the attendance report posted on the student course management system. If the evidence of the mistake is clear and certain, a student may submit an appeal to the Examination and Appeals Committee. The student must submit a completed appeal form to the Office of Registrar within one week of the absence date. No appeal will be accepted after the deadline. Attendance appeals sent by emails will not be accepted. The appeal form will be forwarded to the Examination and Appeals Committee who will take all necessary measures to have the attendance re-assessed in consultation with MedTech's administration and the course instructor.

3. Appeal of a Grade

Students have the right to appeal their final exam grade if they feel that they have been unfairly assessed in a particular course. Only final exam grades may be appealed. The new grade can be equal to, higher than or lower than the grade submitted for review. The procedure for appealing is as

follows:

1. The student must first contact the professor responsible for the course within the appeal period to request a revision of the grades and discuss the grading scheme used.
2. If the previous step is not conclusive, the student should ask for a formal review of his/her grade, within two weeks of receiving the grade by submitting an appeal form to the Office of Registrar.
3. The request will be forwarded to the Examination and Appeals Committee, that will take all necessary measures to review the course grades independently, consulting with faculty, the student concerned, and/or other parties as deemed appropriate.
4. The student will be notified in writing of the Examination and Appeals Committee's decision within thirty calendar days of the submission of the appeal form to the Office of Registrar:
5. The student's final exam grade will be assigned by the Examination and Appeals Committee.

Please note that:

- It is the responsibility of the student to submit all supporting documentation.
- The Examination and Appeals Committee's decision is final.

The revised grade assigned by the Examination and Appeals Committee will appear on the student transcript

X. University Resources

1. IT Resources

a. Helpdesk

The IT Department offers technical assistance at helpdesk@medtech.tn or during office hours posted on the IT Department Office door.

MedTech operates a Wi-Fi network. You may contact the IT helpdesk for network and access credentials.

b. Learning Management System

Moodle is used as the Course Management System (CMS) at MedTech. The CMS is used to manage all MedTech courses. It provides an online environment where instructors can post course materials such as syllabi, sample exams, assignments, and discussion forums. It is also used to share assessment grades with students.

c. Email Regulations

The IT Office assigns all students an official MedTech email account. Email is an official means for communication within the university (i.e., between professors, students, and the administration). All official communications to and from the university should be conducted via MedTech email accounts. Students are responsible for checking their email accounts on a regular basis. Please note that email is not appropriate for transmitting sensitive or confidential information. If a student wishes to have email redirected from his or her official address to another email address (e.g., @gmail.com, @hotmail.com, etc.), they may do so, but at their own risk. MedTech is not responsible for the handling of redirected email by outside vendors or by departmental servers.

2. Advising and Career Guidance

MedTech offers advising and extensive career guidance to its students on a regular basis. This guidance is provided either by faculty members, staff, or by special experts. The aim of guidance is to ensure smooth transition into the new university life for new students, assist with potential academic and personal challenges and provide venues for self-fulfillment.

a. Advising by the ACC

The Advising and Counseling Center (ACC) provides academic advising and individual counseling to current MedTech students. The ACC staff works with members of the University to assist students resolve academic as well as psychological issues. It assists students in developing interpersonal skills to help them grow personally and build more satisfying relationships with friends and family. The ACC helps students with other mental health and psychological issues and assists them in finding appropriate on and off campus resources.

The Advising and Counseling Center collaborates with Academic Affairs and the Office of the Registrar to provide students on academic probation with one-to-one support that can help them improve their grades and return to good academic standing. **Note**: Things to talk about to your counselor can be related to anxiety, depression, academic performance, self-esteem, stress, study

skills, family issues, uncertainty, etc. Services are provided by a licensed counselor.

Services offered by the ACC include:

- Individual counseling sessions.
- Individual academic advising sessions.
- Weekly group sessions or/and workshops related to specific topics.
- Outreach programs to raise awareness about certain mental health and academic issues and improve self-care.
- Peer-to-Peer Program: a free tutoring service offered to MSB and MedTech students. Tutors are fellow students with excellent academic performance. Sessions are offered each quarter based on student requests and tutor availability.

Students can be referred to the ACC by:

- Self -referral.
- A faculty member.
- Student Affairs office/ A staff member.

After a thorough assessment, the counselor will provide helpful information and advice about the student's concern(s). Not all students who visit ACC for counseling will be seen on an ongoing basis at ACC. A student may need to be referred to an off campus professional. After consultation, several outcomes may occur, including but not limited to the following:

- The student may apply the information and advice received on his or her own, and plan to contact ACC again if additional services are needed or the student's attempts are unsuccessful.
- A maximum of 6 counseling sessions per quarter may be offered.
- The student may be asked to join the Peer-to-Peer program.

STUDENTS ON PROBATION

- If a student is admitted on probation, the Admissions Office will notify both Program Management and the ACC. Their academic performance and progress will be closely monitored by both the ACC and Program Management.
- The ACC will contact the students early in the quarter to offer assistance. If the student remains on probation following midterm examinations, the ACC will contact the student once more to assist the student in improving their academic performance.
- Feedback to parents on their child's academic performance is available upon the student's consent.

b. Career and Alumni Center (CAAC)

The CAAC provides career information, placement services, career counseling relevant to majors, and career- opportunities. The CAAC also assists students in developing self-awareness, identifying possible internships, developing job seeking skills, and employment opportunities. In fact, the CAAC works on continuously connecting students, alumni, and companies through annual job fairs, workshops, company visits, regular internships, and job opportunities. Additional services offered by CAAC are:

- SWISSNOVA: a useful tool for self-awareness in decision making.
- Nova Profile Tool: a self-assessment test to help students learn about themselves.
- CV proof-reading.

c. Faculty members

Students build special relations with faculty members and seek advice and guidance from their professors as they face different challenges such as choice of programs, internships, and career opportunities.

3. Resources for International Students

MedTech welcomes students from diverse international backgrounds and strives for their integration and wellbeing while in Tunisia.

a. Housing

MedTech's main campus is located in "Les Jardins du Lac" (also known as "Les Berges du Lac II"), a business and residential district north of downtown Tunis. It is located next to Tunis-Carthage International Airport and the main Tunis-La Marsa (GP9) highway.

While Lac II has a good supply of modern furnished housing, it is considered an expensive residential area. Students are encouraged to look in the surrounding regions of Tunis for more affordable housing: L'Aouina, Ain Zaghouan, La Soukra, and the northern suburbs of Tunis.

b. Transportation

Lac II is centrally located but does suffer from a lack of public transport links. Most bus lines have stops on the La Marsa highway (GP9), but not in the district itself. Taxis are however available and are recommended for most trips. Driving in Tunisia is generally less orderly than in most Western countries. Make sure to wear seatbelts and do not hesitate to inform your driver that you are uncomfortable if they are driving fast or recklessly.

c. Safety and Security

Tunis is generally a safe place to live. The most common risk is petty crime, so please be aware of your valuables at all times, especially if you are in busy areas or are taking any form of public transportation.

d. Language

The common language used by most Tunisians is Arabic. Many Tunisians do speak French. The frequency of French-speaking Tunisians may vary from one region to another. Some Tunisians also do speak English, especially in Tunis and other areas that are tourist

destinations. If you are interested in supplementary language classes, please visit LCI (Languages and Cultures Institute) on campus.
Note: If you have additional questions not answered in this guide, you are encouraged to contact the administration.

4. Parking and Transportation

MedTech has limited parking on site. There is a free public parking area next to the Ooredoo lot that students are strongly encouraged to use. Please be respectful of your fellow drivers and refrain from double-parking. There is still significant construction in the area, and large vehicles come through frequently.
MedTech encourages all students to carpool with their classmates.

a. Food

There are many food options available near campus within 5-to-15-minute walking distance. Otherwise, on campus there are two cafés that serve coffee, pastries, soft drinks, and an assortment of sandwiches at lunchtime.

b. Opening hours

Fall / Spring Terms

- Monday to Friday: 8:00 am to 10:00 pm
- Saturday and Sunday: 8:00 am to 6:00 pm

Summer Term

- Monday to Friday: 8:30 am to 2:30 pm

c. Location

Mediterranean Institute of Technology
Les Jardins du Lac II, 1053 Tunis, Tunisia
Tel. +216 70 016 100 Fax+216 70 016 100
www.medtech.tn

5. Student Activities on Campus

MedTech students benefit from several discounts to local fitness centers, including California Gym and Lake Club. Please verify current offers with the Finance Office (third Floor, MSB Building). Students also benefit from a free soccer annual plan in Olympisky.

a. Class Rep Program

The Class Rep Program is a student-run program that will ensure an interactive relationship between the student body and administration/faculty. The Class rep allows students to communicate their concerns and recommendations regarding academic matters and campus

life. Elections are held usually on the first two weeks of classes. The Class Representative acts as the main contact between students and the MedTech Administration and holds a seat on some committees.

b. Clubs

Several clubs are active on the MedTech-MSB Campus. For up-to-date information on student activities, please consult the Student Clubs Council or visit the webpage http://www.medtech.tn/student-life/student-clubs/
